Study plan

18 suggested study hours; 12 months access

Learning format

Six self-paced written lessons in English with worked examples, exercises, explained answers and a capstone with a self-assessment rubric. Optional automated Course Tutor assistance is available in the protected LMS.

Programme overview

Construct and audit a reproducible chart worksheet from supplied coordinates: civil-time conversion, zodiac longitudes, sign and house labels, Panchang arithmetic and boundary sensitivity. This course teaches calculation literacy and traditional calendar conventions; it does not calculate a real birth chart from scratch or establish predictive validity. Six self-paced written lessons in English with worked examples, exercises, explained answers and a capstone with a self-assessment rubric. Optional automated Course Tutor assistance is available in the protected LMS. Study of traditional and symbolic interpretive methods. Astrological predictions are not scientifically established. No live human classes, personal chart consultation, individual human marking, recorded lecture series, software licence, external accreditation or guaranteed outcome is included. Examples use fictional or supplied data; this course does not provide medical, financial or legal advice. A calculation and software-reproducibility laboratory following the existing Vedic Astrology, Kundali Reading and Panchang/Muhurta programmes. The specialist work is time conversion, coordinate transforms, Panchang arithmetic and boundary audits; electional interpretation remains in the existing Panchang/Muhurta course.

Who this is for

1. Basic arithmetic, fractions and familiarity with the twelve zodiac signs; a calculator or spreadsheet is sufficient.
2. Use fictional or explicitly consented chart data; keep personal birth details private.

Published topics and learning focus

1. Birth records, time zones and reproducible inputs
2. Longitude, zodiac and ayanamsa
3. Lagna, chart layouts and house assignment
4. The five Panchang factors: calculate before interpreting
5. Ephemeris tables, interpolation and boundary sensitivity
6. Capstone: an auditable chart and Panchang worksheet

Before you choose

1. These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
2. ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
3. Current checkout terms and refund policy apply. Payment and access require successful provider verification.
