Learning format

Four self-paced written English lessons in two modules, with original fictional examples, explained practice and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS. Readings are AI-authored with independent AI editorial and primary-source checks; independent human academic review is not included.

Programme overview

Four self-paced written lessons teach cloud concepts, the shared responsibility model, regions and pricing ideas, the core Azure service families (compute, storage, networking, identity), and the basics of security, governance, cost management and monitoring, ending with a fictional landing-zone capstone. This is independent study support, not a full certification syllabus; it includes no exam voucher, no practice-exam bank and no vendor affiliation. Four self-paced written English lessons in two modules, with original fictional examples, explained practice and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS. Readings are AI-authored with independent AI editorial and primary-source checks; independent human academic review is not included. Independent ZELVU study support within the listed scope. No vendor, awarding-body or university certification, official examination, exam voucher, licence or software subscription is included, and ZELVU is not affiliated with any vendor or certifying body. No job placement, income or pass-mark guarantee is made. Live human teaching, individual human marking and a recorded video lecture series are not included. Examination fees, software subscriptions, cloud usage charges and course-completion certificates from third parties are separate. Practical exercises use supplied fictional scenarios and free

or offline alternatives. Suggested study hours include reading, practice and revision, not video runtime. Related ZELVU cloud, Kubernetes and security courses cover other platforms and topics. Exam names and skills change, so check the actual current official exam skills outline before relying on this course for any certification.

Who this is for

1. No prior cloud experience is needed. Comfort with basic computer use and simple networking words such as website and server helps.
2. Use fictional practice material and only accounts, systems and data you are entitled to use. Check the certifying body, employer or institution for current exam, registration and eligibility requirements.

Published topics and learning focus

1. Cloud concepts, shared responsibility, regions and pricing
2. Core services: compute, storage, networking and identity
3. Security, governance, cost management and monitoring
4. Capstone: design a small-business landing zone

Before you choose

1. These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
2. ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
3. Current checkout terms and refund policy apply. Payment and access require successful provider verification.
