6 self-paced written English lessons with original fictional examples, explained practice and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS. Readings are AI-authored with independent AI editorial and primary-source checks; independent human academic review is not included.

Programme overview

Six original practical readings cover controlled editing, multi-document synthesis, project retrieval tests, interactive artifacts, reproducible files and an integrated volunteer-briefing capstone. 6 self-paced written English lessons with original fictional examples, explained practice and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS. Readings are AI-authored with independent AI editorial and primary-source checks; independent human academic review is not included. Independent ZELVU software-use training; no vendor affiliation, official vendor certification, employment or income guarantee is included. Software subscriptions, generation credits, API usage, hardware, paid integrations and certification exams are separate. Check the provider's current eligibility, plan and feature availability before using it. Supplied fictional examples and offline planning alternatives allow study without purchasing an additional service. Live human classes, individual human marking and a recorded video lecture series are not included. Suggested study time includes reading, practice and revision; it is not video runtime. Practical automation exercises do not authorise sending real messages, making payments or changing live records. The same written material is included in Practical AI Software - Complete Collection. Choose this focused course or the combined

collection; buying both duplicates this material. A combined purchase does not grant separate focused-course entitlements. Existing related courses are sold separately.

Who this is for

1. Basic English, browser use and arithmetic. Use an authorised Claude account for optional live practice; all supplied-data tasks have a text or paper fallback. Vendor subscriptions and usage are separate.
2. Use supplied fictional data and assets you are entitled to use. Follow each software provider's current age, account, privacy and usage requirements.

Published topics and learning focus

1. Claude as an editorial assistant: preserve meaning while improving writing
2. Document synthesis in Claude: reconcile rather than flatten disagreement
3. Claude Projects: organise knowledge and test retrieval
4. Claude Artifacts: build and inspect a small interactive prototype
5. Claude files and research: produce a reproducible comparison report
6. Capstone: a volunteer briefing with evidence, prototype and review

Before you choose

1. These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
2. ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
3. Current checkout terms and refund policy apply. Payment and access require successful provider verification.
