COURSE BROCHURE

Cypress End-to-End & Component Testing Foundations

Diploma, Vocational & Skills / Software Testing & QA

One-time full-course fee

INR 1,499

Access

12 months course access

Study plan

24 suggested study hours; 12 months access

Learning format

6 self-paced written English lessons with original explanations, worked examples, answered exercises and a self-assessed capstone. Includes a protected downloadable local QA practice kit. Existing automated Course Tutor assistance is available in the LMS.

Programme overview

Test a small local web interface with stable selectors, retry-aware assertions, isolated state, controlled network responses and a React component exercise. Six original readings cover a defined beginner-to-intermediate practice scope, not every Cypress feature or a vendor qualification. 6 self-paced written English lessons with original explanations, worked examples, answered exercises and a self-assessed capstone. Includes a protected downloadable local QA practice kit. Existing automated Course Tutor assistance is available in the LMS. Independent ZELVU practical study. No live instructor classes, recorded lecture series, individual human grading, job placement, external certification, ISTQB accreditation or examination voucher is included. Use only supplied local or explicitly authorised lab targets and fictional data. Tool installation and any required device/emulator are the learner's responsibility; paid cloud services and AI APIs are not required for the supplied exercises. These readings may also be included in the separately offered Software QA and SDET Learning Path; compare its published syllabus before buying both.

Who this is for

1. JavaScript, HTML and basic web testing. A local Node.js environment with compatible Cypress dependencies is required for Cypress execution. The React component exercise also needs the documented React/Vite setup. No paid Cypress Cloud account is required.
2. Use fictional data and local or explicitly authorised test systems.

Published topics and learning focus

1. Build a Local Interface and a Meaningful First Test
2. Use Retry-Aware Assertions Without Arbitrary Sleeps
3. Keep Tests Independent and Data Deliberate
4. Test Success and Error States with Network Interception
5. Test a React Component at a Smaller Boundary
6. Capstone: Deliver a Small Reliable Browser Test Suite

Before you choose

1. These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
2. ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
3. Current checkout terms and refund policy apply. Payment and access require successful provider verification.
