COURSE BROCHURE

Generative AI for Software Testers: Practical Foundations

Diploma, Vocational & Skills / Software Testing & QA

One-time full-course fee

INR 1,499

Access

12 months course access

Study plan

18 suggested study hours; 12 months access

Learning format

6 self-paced written English lessons with original explanations, worked examples, answered exercises and a self-assessed capstone. Includes a protected downloadable local QA practice kit. Existing automated Course Tutor assistance is available in the LMS.

Programme overview

Use structured prompts and supplied fictional AI outputs to analyse requirements, review generated test cases and code, protect information, and evaluate the usefulness of an assisted testing workflow. No model account or paid API is required; this course concerns using AI in testing, not certifying or fully evaluating AI products. 6 self-paced written English lessons with original explanations, worked examples, answered exercises and a self-assessed capstone. Includes a protected downloadable local QA practice kit. Existing automated Course Tutor assistance is available in the LMS. Independent ZELVU practical study. No live instructor classes, recorded lecture series, individual human grading, job placement, external certification, ISTQB accreditation or examination voucher is included. Use only supplied local or explicitly authorised lab targets and fictional data. Tool installation and any required device/emulator are the learner's responsibility; paid cloud services and AI APIs are not required for the supplied exercises. These readings may also be included in the separately offered Software QA and SDET Learning Path; compare its published syllabus before buying both.

Who this is for

1. Manual test design and basic reading of Python. Required exercises use supplied outputs and standard-library local code, with no real learner or customer data.
2. Use fictional data and local or explicitly authorised test systems.

Published topics and learning focus

1. Choose a bounded AI-assisted testing task
2. Write prompts that expose assumptions
3. Review generated cases for correctness and coverage
4. Review and test generated code locally
5. Control information and measure useful assistance
6. Capstone: review an AI-assisted reservation test pack

Before you choose

1. These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
2. ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
3. Current checkout terms and refund policy apply. Payment and access require successful provider verification.
