Learning format

Four self-paced written English lessons in two modules, with original fictional examples, explained practice and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS. Readings are AI-authored with independent AI editorial and primary-source checks; independent human academic review is not included.

Programme overview

Four self-paced written lessons teach Google Cloud basics: cloud concepts and shared responsibility, the organisation-folder-project hierarchy, regions and zones, core compute, storage, BigQuery, networking and IAM services, and operations, security and cost control, ending with a fictional design capstone. This is independent study support, not a full certification syllabus; it includes no exam voucher, no practice-exam bank and no vendor affiliation. Four self-paced written English lessons in two modules, with original fictional examples, explained practice and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS. Readings are AI-authored with independent AI editorial and primary-source checks; independent human academic review is not included. Independent ZELVU study support within the listed scope. No vendor, awarding-body or university certification, official examination, exam voucher, licence or software subscription is included, and ZELVU is not affiliated with any vendor or certifying body. No job placement, income or pass-mark guarantee is made. Live human teaching, individual human marking and a recorded video lecture series are not included. Examination fees, software subscriptions, cloud usage charges and course-completion certificates from third parties are separate. Practical exercises use supplied fictional scenarios and free or offline alternatives. Suggested study hours include reading, practice and revision, not video runtime. Related ZELVU cloud, data and Kubernetes courses cover other platforms and topics. Exam names and

skills change, so check the actual current official exam skills outline before relying on this course for any certification.

Who this is for

1. No prior cloud experience is needed. Basic computer skills and familiarity with websites and files are enough.
2. Use fictional practice material and only accounts, systems and data you are entitled to use. Check the certifying body, employer or institution for current exam, registration and eligibility requirements.

Published topics and learning focus

1. Cloud concepts, resource hierarchy, regions and pricing
2. Core services: compute, storage, BigQuery, networking and IAM
3. Security, operations, reliability and cost control
4. Capstone: design and justify a small-business Google Cloud environment

Before you choose

1. These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
2. ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
3. Current checkout terms and refund policy apply. Payment and access require successful provider verification.
