4 self-paced written English lessons with original fictional examples, explained practice and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS. Readings are AI-authored with independent AI editorial and primary-source checks; independent human academic review is not included.

Programme overview

Four original readings teach reliable briefs, file and image reasoning, separate Canvas and reusable-instruction workflows, current Gems-to-skills transition awareness and a source-bound learning-pack capstone. 4 self-paced written English lessons with original fictional examples, explained practice and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS. Readings are AI-authored with independent AI editorial and primary-source checks; independent human academic review is not included. Independent ZELVU software-use training; no vendor affiliation, official vendor certification, employment or income guarantee is included. Software subscriptions, generation credits, API usage, hardware, paid integrations and certification exams are separate. Check the provider's current eligibility, plan and feature availability before using it. Supplied fictional examples and offline planning alternatives allow study without purchasing an additional service. Live human classes, individual human marking and a recorded video lecture series are not included. Suggested study time includes reading, practice and revision; it is not video runtime. Practical

automation exercises do not authorise sending real messages, making payments or changing live records. The same written material is included in Practical AI Software - Complete Collection. Choose this focused course or the combined collection; buying both duplicates this material. A combined purchase does not grant separate focused-course entitlements. Existing related courses are sold separately.

Who this is for

1. Basic English, browser use and arithmetic. Optional live practice uses an authorised Google account with available Gemini features; all fictional tasks can be completed in text. Software plans and credits are excluded.
2. Use supplied fictional data and assets you are entitled to use. Follow each software provider's current age, account, privacy and usage requirements.

Published topics and learning focus

1. Gemini Apps: draft, compare and revise with a clear evidence boundary
2. Gemini file and image analysis: validate extraction before conclusions
3. Canvas and Gems: reusable work with explicit limits and tests
4. Capstone: a source-bound learning brief and checked planning table

Before you choose

1. These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
2. ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
3. Current checkout terms and refund policy apply. Payment and access require successful provider verification.
