12 suggested study hours; 12 months access

Learning format

Four self-paced written English lessons in two modules, with original fictional examples, explained practice and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS. Readings are AI-authored with independent AI editorial and primary-source checks; independent human academic review is not included.

Programme overview

Four original written lessons on digital-service troubleshooting, entitlement matrices, holdings metadata and comparable usage analysis, with a fictional renewal-review capstone. No live network administration, procurement or subscription access is included. Four self-paced written English lessons in two modules, with original fictional examples, explained practice and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS. Readings are AI-authored with independent AI editorial and primary-source checks; independent human academic review is not included. Independent ZELVU study support within the listed scope. No university degree, recognised diploma, official examination, vendor accreditation, recruitment eligibility, job placement or outcome guarantee is included. Live human teaching, individual human marking and a recorded video lecture series are not included. Software hosting, paid subscriptions, proprietary classification schedules and standards, examination fees and university fees are separate. Practical exercises use supplied

fictional data and offline planning alternatives; a hosted Koha or DSpace system is not provided. Suggested study hours include reading, practice and revision, not video runtime. Related existing degree/NET support courses remain separately sold; review their syllabus before purchase.

Who this is for

1. Basic library knowledge, browser and spreadsheet familiarity, English reading and simple percentage/division calculations. All required datasets are supplied in the lessons.
2. Use fictional practice records and resources you are entitled to use. Check your university, employer or examination authority for any separate qualification and selection requirements.

Published topics and learning focus

1. Map a library digital service and investigate access failures
2. Translate e-resource evidence into an access matrix
3. Maintain holdings metadata and reliable resource links
4. Capstone: evaluate e-resource use without misleading metrics

Before you choose

1. These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
2. ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
3. Current checkout terms and refund policy apply. Payment and access require successful provider verification.
