COURSE BROCHURE

Local and Open-Weight AI Tools: Ollama, LM Studio and Hugging Face

Diploma, Vocational & Skills / AI Software & Automation

One-time full-course fee

INR 1,499

Access

12 months course access

Study plan

14 suggested study hours; 12 months access

Learning format

6 self-paced written English lessons with original fictional examples, explained practice and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS. Readings are AI-authored with independent AI editorial and primary-source checks; independent human academic review is not included.

Programme overview

Select, inspect and evaluate local-model workflows using Ollama, LM Studio and Hugging Face, with DeepSeek and Qwen model-family discovery where suitable. Includes original offline fixtures; no mandatory download, cloud account or paid inference. Open-weight and open-source are distinguished. 6 self-paced written English lessons with original fictional examples, explained practice and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS. Readings are AI-authored with independent AI editorial and primary-source checks; independent human academic review is not included. Independent ZELVU software-use training; no vendor affiliation, official vendor certification, employment or income guarantee is included. Software subscriptions, generation credits, API usage, hardware, paid integrations and certification exams are separate. Check the provider's current eligibility, plan and feature availability before using it. Supplied fictional examples and offline planning alternatives allow study without purchasing an additional service. Live human classes, individual human marking and a recorded video lecture series are not included. Suggested study time

includes reading, practice and revision; it is not video runtime. Practical automation exercises do not authorise sending real messages, making payments or changing live records. The same written material is included in Practical AI Software - Complete Collection. Choose this focused course or the combined collection; buying both duplicates this material. A combined purchase does not grant separate focused-course entitlements. Existing related courses are sold separately.

Who this is for

1. Basic computer file skills; Python 3 for offline evaluation scripts. Optional local inference needs independently checked hardware and an already-authorized compatible model.
2. Use supplied fictional data and assets you are entitled to use. Follow each software provider's current age, account, privacy and usage requirements.

Published topics and learning focus

1. Read model cards, licences and hardware requirements
2. Use Ollama with a verified local model boundary
3. Use LM Studio and inspect the whole data path
4. Compare local models with a small reproducible test set
5. Build a transparent local source-grounding workflow
6. Capstone: choose and document a bounded local-AI workflow

Before you choose

1. These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
2. ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
3. Current checkout terms and refund policy apply. Payment and access require successful provider verification.
