Medical Coding Foundations: ICD-10-CM

Diploma, Vocational & Skills / Medical Coding & Billing

One-time full-course fee

INR 3,999

Access

12 months course access

Study plan

Self-paced written foundations; 12 months access

Learning format

Eight self-paced written lessons in English, fictional worked cases, explained practice and a final exercise with a model solution. Automated Course Tutor support is available in the LMS.

Programme overview

A bounded nonclinical foundation in US ICD-10-CM diagnosis coding: select the applicable edition and setting, abstract documented facts, navigate the Index and Tabular List, apply core conventions, distinguish uncertain outpatient and eligible inpatient diagnoses, identify query needs, and audit a fictional coding worksheet. Includes original written teaching, practice with explained answers and a self-assessed capstone. It is not comprehensive chapter-by-chapter specialist coding, full CPC exam preparation, a clinical qualification, an AAPC/AHIMA credential, a licensed CPT reference, or a placement programme. Eight self-paced written lessons in English, fictional worked cases, explained practice and a final exercise with a model solution. Automated Course Tutor support is available in the LMS. Nonclinical foundation training. No live classes, recorded lecture series, individual human marking, software subscription, job guarantee, AAPC/AHIMA affiliation or external professional certification is included. External examinations, memberships and licensed reference materials are separate. US coding and billing examples are not an Indian insurer rulebook. Medical vocabulary is reviewed briefly. This course focuses on US diagnosis-coding foundations; CPT, HCPCS and inpatient procedure-coding mastery and complete CPC examination preparation are outside its scope.

Who this is for

- 1 For adults comfortable with medical terminology and English documentation; study the terminology foundation first if needed.
- 2 Use fictional information for every exercise; do not upload identifiable patient records.

Published topics and learning focus

- 1 Coding systems, editions and a safe workflow
- 2 Abstracting records without inventing diagnoses
- 3 From an Index term to a verified code
- 4 Laterality, completeness and seventh characters
- 5 Reading classification notes and building a sequence
- 6 Outpatient, inpatient and uncertain diagnoses
- 7 Queries, quality audit and billing handoff
- 8 ICD-10-CM foundations capstone and model answer

Before you choose

- 1 These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
- 2 ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
- 3 Current checkout terms and refund policy apply. Payment and access require successful provider verification.
