COURSE BROCHURE

Playwright with TypeScript - Practical Foundations

Diploma, Vocational & Skills / Software Testing & QA

One-time full-course fee

INR 1,999

Access

12 months course access

Study plan

28 suggested study hours; 12 months access

Learning format

6 self-paced written English lessons with original explanations, worked examples, answered exercises and a self-assessed capstone. Includes a protected downloadable local QA practice kit. Existing automated Course Tutor assistance is available in the LMS.

Programme overview

Six original practical readings on a local quotation UI, user-facing locators, retrying assertions, typed fixtures, browser response mocks, a loopback HTTP check, projects, traces and an assessed evidence capstone. Selected foundations, not complete browser, accessibility, security or payment certification. 6 self-paced written English lessons with original explanations, worked examples, answered exercises and a self-assessed capstone. Includes a protected downloadable local QA practice kit. Existing automated Course Tutor assistance is available in the LMS. Independent ZELVU practical study. No live instructor classes, recorded lecture series, individual human grading, job placement, external certification, ISTQB accreditation or examination voucher is included. Use only supplied local or explicitly authorised lab targets and fictional data. Tool installation and any required device/emulator are the learner's responsibility; paid cloud services and AI APIs are not required for the supplied exercises. These readings are included in the separately offered Software QA and SDET Learning Path; compare its published syllabus before buying both. The small quotation scenario is also used in the Selenium packs, with different framework-specific implementations and exercises.

Who this is for

1. Manual testing foundations and basic TypeScript, async functions and command-line use. A laptop or desktop, a supported Node.js release with npm, an editor, local browser installation permissions and internet for initial package/browser downloads. No paid tools, public API or production account required.
2. Use fictional data and local or explicitly authorised test systems.

Published topics and learning focus

1. Build a local TypeScript browser exercise
2. Choose stable locators and observable outcomes
3. Create typed fixtures without shared state
4. Separate mocked UI checks from API checks
5. Use projects and traces to explain failures
6. Capstone: a reproducible quotation evidence pack

Before you choose

1. These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
2. ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
3. Current checkout terms and refund policy apply. Payment and access require successful provider verification.
