COURSE BROCHURE

PLC, VFD & Motor-Control Concepts

Diploma, Vocational & Skills / Industrial Automation, PLC & SCADA

One-time full-course fee

INR 3,499

Access

12 months course access

Study plan

16 suggested study hours; 12 months access

Learning format

4 self-paced written English lessons with original worked examples, disconnected simulation or paper exercises, explained knowledge checks and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS.

Programme overview

Four original written lessons on motor and load context, drive command/feedback contracts, reference scaling, ramp arithmetic, fault evidence and an offline PLC-to-drive capstone. 4 self-paced written English lessons with original worked examples, disconnected simulation or paper exercises, explained knowledge checks and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS. AI-authored with independent AI editorial checks; independent human academic review is not included. Independent ZELVU vocational study using fictional exercises. No vendor affiliation, OEM certification, engineering software licence, PLC or HMI hardware, supervised physical laboratory, live human instruction, individual human marking, recorded video lecture series or placement guarantee is included. Simulation results do not establish physical equipment competence. Ordinary PLC logic is not a safety-rated emergency-stop system. Real wiring, energisation and commissioning require qualified supervision, equipment-specific procedures and authorised isolation; do not connect these training exercises to a live plant. Included in PLC & Industrial Automation Complete Course; buying both repeats these lessons. The bundle does not grant separate focused-course entitlements. Some motor/automation concepts may overlap with the separately sold Robotics & Automation degree-support course; its existing material and access remain separate.

Who this is for

1. PLC foundations and basic algebra. Exercises use fictional data and disconnected paper or spreadsheet models; physical motor or drive access is not required.
2. Use only the supplied fictional data and disconnected training environment. Keep real plant credentials, network addresses, private programs and customer information out of the Course Tutor.

Published topics and learning focus

1. Motor, Drive and Load: Read the Operating Context
2. Drive Commands, Feedback and Reference Scaling
3. Ramps, Load Constraints and Fault Evidence
4. Capstone: A PLC-to-Drive Control and Evidence Package

Before you choose

1. These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
2. ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
3. Current checkout terms and refund policy apply. Payment and access require successful provider verification.
