COURSE BROCHURE

QGIS: Practical Digital Mapping

Diploma, Vocational & Skills / Geospatial Software & Mapping

One-time full-course fee

INR 3,499

Access

12 months course access

Study plan

18 suggested study hours; 12 months access

Learning format

4 self-paced written English lessons with original worked examples, local exercises, explained knowledge checks and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS.

Programme overview

Four original written workshops completing an offline fictional point-and-zone mapping workflow: CSV/WKT import, declared CRS, attribute checks, symbols/labels, planar selection and a print-layout capstone. Targets documented QGIS 3.44 workflows; not a complete GIS, remote-sensing, surveying, route-access or professional-certification programme. Numerical examples are independently checked; author GUI execution is not claimed. 4 self-paced written English lessons with original worked examples, local exercises, explained knowledge checks and a self-assessed capstone. Optional automated Course Tutor assistance is available in the protected LMS. AI-authored with independent AI editorial checks; independent human academic review is not included. An independent ZELVU short course covering the stated scope. Live human tuition, individual human marking, recorded video lectures, external qualifications or academic credits, vendor certification, examination vouchers and placement guarantees are not included. Use your own compatible computer and any required basic art supplies; these are not supplied. No paid software subscription or paid AI API is required for the supplied practice. Follow the documented software version; interface details can change. The separately sold Remote Sensing, GIS & Earth Observation Foundations course uses paper/optional spreadsheet exercises and teaches sensor and data concepts. This course adds a distinct QGIS software workflow and exported map. Coordinate concepts overlap; existing material and entitlements remain separate.

Who this is for

1. A computer able to run QGIS, basic file handling and elementary arithmetic. QGIS is separate free software. All data is supplied as small fictional CSV files; no paid GIS, plugin, basemap, account or real location data is required. Paper work does not complete GUI practical requirements.
2. Use the supplied fictional examples or your own non-sensitive practice material. Do not enter private student, employer or customer information into the Course Tutor.

Published topics and learning focus

1. Offline Data and Coordinate Setup
2. Attributes, Symbols and Labels
3. Zones, Distance and Reconciliation
4. Digital Mapping Capstone

Before you choose

1. These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
2. ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
3. Current checkout terms and refund policy apply. Payment and access require successful provider verification.
