COURSE BROCHURE

Selenium WebDriver with Java & TestNG - Practical Foundations

Diploma, Vocational & Skills / Software Testing & QA

One-time full-course fee

INR 1,999

Access

12 months course access

Study plan

30 suggested study hours; 12 months access

Learning format

6 self-paced written English lessons with original explanations, worked examples, answered exercises and a self-assessed capstone. Includes a protected downloadable local QA practice kit. Existing automated Course Tutor assistance is available in the LMS.

Programme overview

Six lessons provide a pinned Java setup, complete local HTML fixture, stable locators, explicit waits, a page object, TestNG data/lifecycle guidance, frame/window examples and a bounded browser-suite capstone. No backend, live payment or full cross-device certification is implied. 6 self-paced written English lessons with original explanations, worked examples, answered exercises and a self-assessed capstone. Includes a protected downloadable local QA practice kit. Existing automated Course Tutor assistance is available in the LMS. Independent ZELVU practical study. No live instructor classes, recorded lecture series, individual human grading, job placement, external certification, ISTQB accreditation or examination voucher is included. Use only supplied local or explicitly authorised lab targets and fictional data. Tool installation and any required device/emulator are the learner's responsibility; paid cloud services and AI APIs are not required for the supplied exercises. These readings are also included in the separately offered Software QA and SDET Learning Path; compare its published syllabus before buying both. The original quotation UI is reused across the Java and Python Selenium packs to compare implementations.

Who this is for

1. Java basics, HTML/DOM familiarity, Java17+, Maven and a supported locally installed browser. Initial open-source browser/driver dependency downloads may be required.
2. Use fictional data and local or explicitly authorised test systems.

Published topics and learning focus

1. Setting Up Selenium Java and a Local Browser Fixture
2. Choosing Stable Locators and Meaningful Interactions
3. Synchronising with State Instead of Sleeping
4. Designing a Small Page Object without Hiding Assertions
5. Handling Frames, Windows and Failure Evidence
6. Capstone: A Reliable Local Java Browser Suite

Before you choose

1. These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
2. ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
3. Current checkout terms and refund policy apply. Payment and access require successful provider verification.
