Learning format

Self-paced selected subject readings, teaching methodology and Course Tutor support

Programme overview

Subject tutorials for Trained Graduate Teacher aspirants: computer systems, python, data structures, networks, relational databases and sql. Includes selected published foundation readings and teaching-methodology support; complete recruiter-specific syllabus coverage is not certified. This initial reading set focuses on Python and core computing. Complete C++/object-oriented programming, Boolean algebra and every recruiter-specific advanced topic are not included; compare the relevant official syllabus before enrolling.

Who this is for

1. Graduates, teacher-training students and aspirants preparing for the relevant TGT subject; review the published reading index before enrolling.
2. Course enrolment is separate from recruitment eligibility. Verify the current notice for degree subjects, teacher-training qualification, CTET/TET, marks, age and relaxations.
3. Independent ZELVU learning support. This course does not award a B.Ed., CTET/TET qualification or government appointment, and does not imply recruiting-authority affiliation.

Published topics and learning focus

1. Computer systems and programming fundamentals
2. Python functions and exception handling
3. Data structures, stacks, queues and algorithms
4. Networks, relational databases and SQL
5. Child development, lesson planning and assessment

Before you choose

1. These are published programme highlights, not certification of complete syllabus coverage. Review the available reading index and programme trial before enrolling.
2. ZELVU provides learning support. It does not award the underlying degree, professional registration or an examination result.
3. Current checkout terms and refund policy apply. Payment and access require successful provider verification.
