Study plan	**Learning format**
Self-guided research	**Downloadable planning guide and online subject checks**

Programme overview

Match the programme to your experience, mathematical preparation and intended professional jurisdiction. Compare three Supply Chain Management programmes at your intended qualification level using the institutions' official curricula and requirements.

Who this is for

1. Prospective international students and parents researching this subject area.

Your subject research checklist

1. For an MBA, check work-experience expectations and compare a management master's where relevant.
2. For finance or analytics, verify calculus, statistics and programming prerequisites.
3. For law and accounting, ask the relevant professional regulator about qualification recognition; a degree is not a practice licence.
4. Academic fit: record previous subjects, grades, language evidence and any portfolio, entrance test or work experience.

5 Cost: save official tuition, living-cost estimates, currency, deposit deadlines and cancellation conditions with the date checked.

6 Outcome: distinguish the qualification from professional registration, placement and immigration outcomes; verify each separately.

7 Area example: Compare two MBA offers using total cost, curriculum, class experience profile and published placement methodology. Do not treat an average salary as a personal forecast.

8 Your output: a three-option comparison and unanswered questions for universities. Mark missing facts as unverified.

Before you choose

1 This guide is not a degree, a partner-university listing, or an additional paid ZELVU course. University tuition and government charges are separate.

2 Verify recognition, eligibility, curriculum, fees and deadlines directly for the institution, campus, level and intake. Admission and visa decisions remain with the relevant authorities.

3 Optional consultation, shortlisting and application support have separate scopes and fees. No admission, scholarship or visa outcome is guaranteed.
